

MaxQ Digital

Maximizing Social Commerce

Quantifying Outcomes

About MaxQ (& Me)

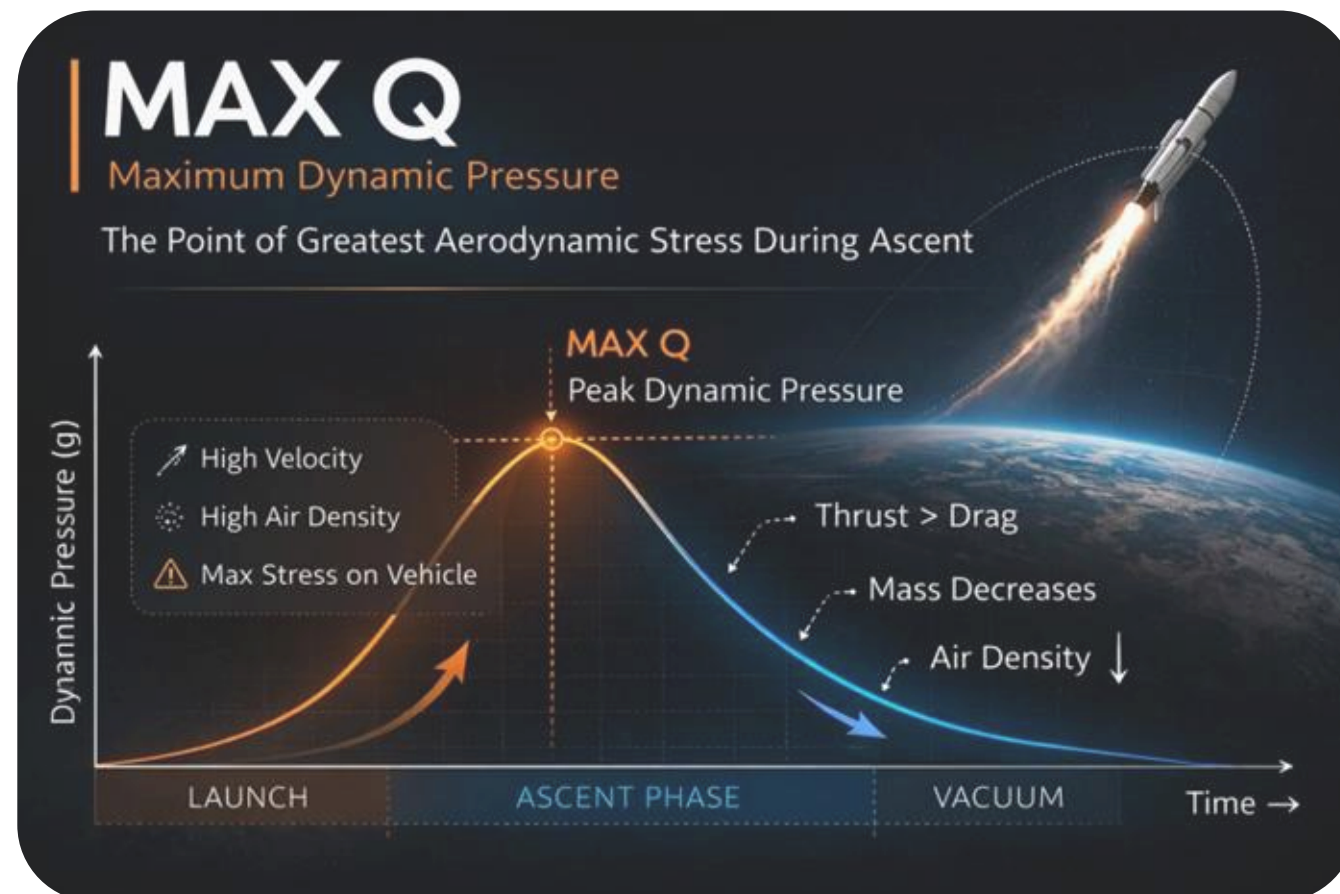

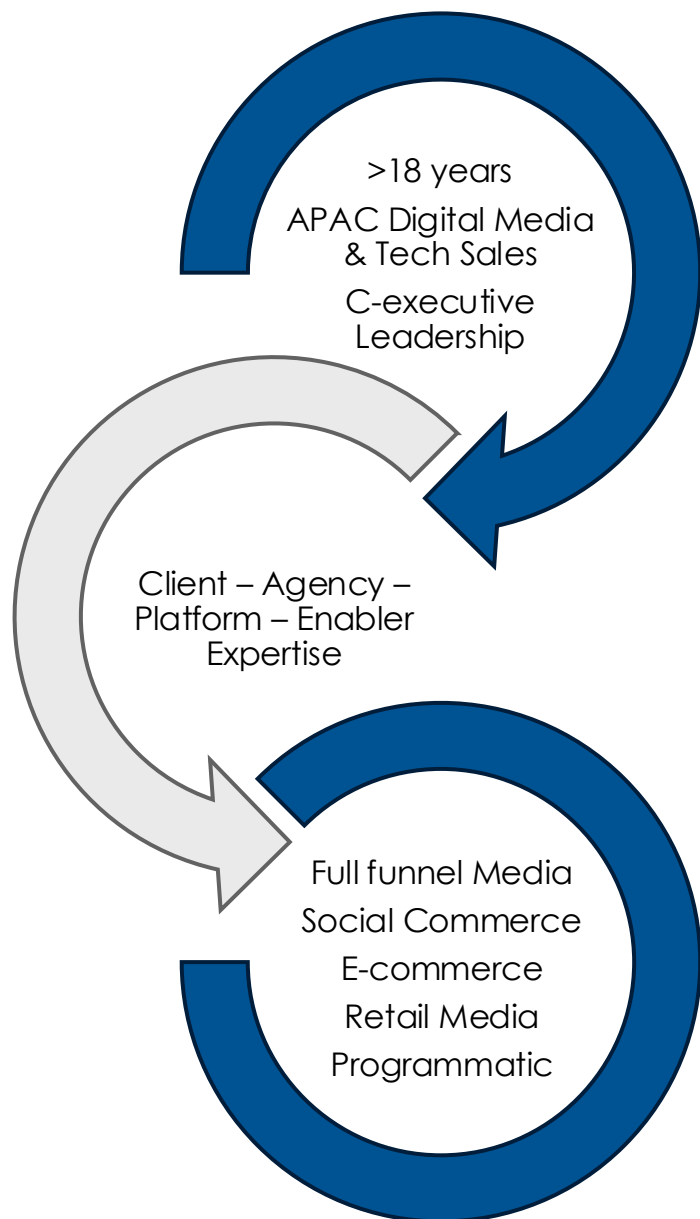

'Max Q' is the moment during ascent when the launch rocket experiences maximum dynamic pressure - the point where aerodynamic forces (air density x velocity squared) places the greatest stress on the vehicle - threatening implosion.

It's the phase where margins matter most, speed is throttled back a little, and decisions must be precise.

As a metaphor, MaxQ Digital aims to help digital businesses navigate the intersection of culture, commerce and technology, understand the advent in AI, automation and emerging products and identify strategic pathways to navigate for success.

It's also a playful nod to GMV Max, the automation tool rolled out by TikTok & Shopee that optimizes GMV outcomes via strategic consumer signals in real time.

+140% YOY in Operating
Profit, scaled SOCOM
capabilities for >160pax

TikTok

6x SEA markets, handled
